

WHAT'S IN THE BOX

10 START/STOP PUSH CONTROL

• In standby mode, the indicator is off, press the button, the indicator turns on. The **High Speed Blender** doesn't work until any functional button is pressed. In working mode, the **High Speed Blender** can be stopped by pressing this button, and then the blender will be in standby mode.

11 PULSE PUSH CONTROL

• Press the button without releasing it, the indicator turns on and the **High Speed Blender** starts to work. If the button is released, the indicator will turn off and blender will stop; if the button is pressed for over 2 minutes, the **High Speed Blender** will stop automatically.

12 ICE CRUSH CONTROL

• Press the button, the indicator turns on and the **High Speed Blender** starts the ice crushing mode. The **High Speed Blender** will stop automatically after 1 minute. The indicator will blink 3 times before it turns off; you can pause it by pressing it again during blender operation.

13 SMOOTHIE CONTROL

• Press the button, the indicator turns on and the **High Speed Blender** starts the smoothie mode. The **High Speed Blender** stops automatically after 1 minute. The indicator will blink 3 times before it turns off; you can pause it by pressing it again during the blender operation.

14 LOW SPEED CONTROL

• Press the button, the indicator turns on and the **High Speed Blender** start to work at the lowest speed. The blender stops automatically after 2 minutes and the indicator starts to blink 3 times before it turns off; you can pause it by pressing it again during blender operation.

15 MEDIUM SPEED CONTROL

• Press the button, the indicator turns on and the **High Speed Blender** starts to work at the medium speed. The blender stops automatically after 2 minutes. The indicator will blink 3 times before it turns off; you can pause it by pressing it again during blender operation.

16 HIGH SPEED CONTROL

• Press the button, the indicator turns on and the **High Speed Blender** starts to work at the highest speed. The blender stops automatically after 2 minutes. The indicator will blink 3 times

FEATURES

- 1200 Watts of Power
- Smoothies, Juices, Purées, Food Prep and More
- 3 Speed Setting
 - Low, Medium and High
- 6 Stainless Steel Sharp Blades
- 64-oz. Tritan Jar, BPA Free
- PULSE Control
 - To achieve desired texture
- SMOOTHIE Control
- ICE Crush Control

ASSEMBLY

QUICK START GUIDE

- 1 Before first use, hand wash with mild soap Removable Measuring Cup, Lid, Tritan Jar and Blades with a brush. **WARNING: Be Careful, blades are very sharp!** Rinse well all parts and dry.
- 2 Place Blender Base on a sturdy horizontal surface and press base down so that the four Suction Blender Feet secure the blender in place.
- 3 Assemble all parts washed in step 1 onto Blender Base.
- 4 Insert power plug into power outlet. **NOTE: Control Panel turns on for 2 seconds then turns off, the blender is in standby mode. If blender is not in operation mode for 3 minutes, the blender will be dormant. To activate the blender again, it MUST be replugged or Jar removed and placed back onto the Blender Base again.**
- 5 Remove Lid, add liquid ingredients first, then follow with solid ingredients in small pieces, then frozen ingredients. **NOTE: This will provide more consistent blending and prevent unnecessary stress on the motor. Food to liquid ratio is 2:3 and the amount of ingredients should NOT exceed the MAX level as indicated on the Jar. WARNING: Always remove the core from fruits, vegetables and cut into small pieces. Never use boiling or hot liquids or run the blender empty.**
- 6 Place Measuring Cup and Lid back on the Blender Jar.
- 7 Press the START/STOP button, then choose from the 6 function controls; PULSE, LOW speed, MEDIUM speed, HIGH speed, SMOOTHIE control or ICE crush control. Press START/STOP control a second time to stop the blender's operation.

WARNING: Do not run the blender for more than 3 minutes at a time, and always wait until the unit is cooled to room temperature before performing next operating cycles.

IMPORTANT OPERATING TIPS

- For quick or delicate blending tasks, press the PULSE control and hold for a few seconds and then release. Operate several times until the consistency you want is obtained.
- If you want to add ingredients while the **High Speed Blender** is operating, remove the Measuring Cup and place ingredients through the Lid opening.
- When crushing ice or hard food, keep one hand firmly on the Lid.
- **WARNING: For each use, the consecutive operation time should be less than 3 minutes. At least 10 minutes rest time MUST be maintained between two continuous cycles. Let the blender cool down to room temperature before performing the next operating cycle.**
- **If you want to stop the blender during operation, press the START/STOP control at anytime.**
- Always pour liquids into the jar first and then the solids for better blending results and less stress on the motor.
- Some tasks that cannot be performed efficiently in a blender are beating egg whites, whipping cream, mashing potatoes, grinding meat, mixing dough, and extracting juice from fruits and vegetables.
- **WARNING: The following items should never be placed in the blender as they may cause damage: bones, large pieces of solid, frozen food, or tough foods such as turnips.**
- **TO DISLODGE FOOD:** Use a plastic spatula to help remove food lodged around the blade assembly. **DO NOT USE SPATULA UNTIL YOU HAVE TURNED THE BLENDER OFF.** Replace the Lid, Removable Measuring Cup and continue blending, if necessary.
- Make sure spatula is **NOT** inside the Blender Jar before blending.
- **WHEN BLENDING IS FINISHED:** Press the START/STOP control and unplug the blender from the electrical outlet.
- Never remove the Blender Jar from the Jar pad until the blender is off. Simply lift Blender Jar from Jar Pad.
- **Do NOT** put hands into Blender Jar with blender plugged in.
- In the event the blender loses power and shuts off, simply unplug the blender, and then plug it back in. Press START/STOP control to power the blender on.
- If the blender has overheated, let it cool down (15 minutes) before powering on again.
